### Ethics & Performance

Ethisphere's annual practice of tracking how the stock prices of publicly traded honorees compare to the Large Cap Index found that listed 2019 World's Most Ethical Companies outperformed the large cap sector over five years by 14.4 percent and over three years by 10.5 percent.

### Methodology & Scoring

The World's Most Ethical Companies assessment is based upon the Ethisphere Institute's [Ethics Quotient](#)® (EQ) framework, which offers a quantitative way to assess a company's performance in an objective, consistent and standardized manner. The information collected provides a comprehensive sampling of definitive criteria of core competencies rather than all aspects of corporate governance, risk, sustainability, compliance and ethics.

Scores are generated in five key categories: ethics and compliance program (35 percent), culture of ethics (20 percent), corporate citizenship and responsibility (20 percent), governance (15 percent) and leadership and reputation (10 percent). All companies that participate in the assessment process receive their scores, providing them with valuable insights into how they stack up against leading organizations.
