

Henry Schein Medical Announces Private Label-Branded Product, OneStep™ + Pro Hb Analyzer

April 24, 2019

Company to Offer Practitioners Point-of-Care Hemoglobin Analyzer for Fast Delivery of Blood Test Results

MELVILLE, N.Y.--(BUSINESS WIRE)--Apr. 24, 2019-- Henry Schein Medical, the U.S. medical business of Henry Schein, Inc. (Nasdaq: HSIC), announced today its new private label-branded product, OneStep™ + Pro Hb Analyzer, a portable, reagent-free hemoglobin analyzer, which measures hemoglobin concentration as a result of a fingerstick blood test. Distributed in the United States, the analyzer can quickly determine low or high levels of hemoglobin, making it possible for practitioners to determine why a patient may be fatigued or not feeling well.

"We have been working diligently to expand our private label portfolio with cost-effective, high-quality solutions our customers can rely on to meet their practice and patient needs," said Brad Connett, President, U.S. Medical Group, Henry Schein. "With the addition of OneStep + Pro Hb Analyzer, customers at physicians' offices, clinics and other non-traditional laboratory locations can deliver quick and convenient tests thanks to a premier analyzer with reliable, laboratory-quality performance."

The OneStep + Pro Hb Analyzer provides clinicians at Physician Office Labs, Family/Internal Medicine clinics, OB/GYN Centers, Pediatric clinics, Planned Parenthoods, Community Health Centers and Urgent Cares with accurate hemoglobin and hematocrit measurements within three seconds of collecting a blood sample in a cuvette - a straight-sided, optically clear container for holding liquid samples - and inserting into the analyzer. This helps ensure fast results for patient health checks and anemia screening at the point-of-care setting.
