

Henry Schein One Announces Dentrrix Smart Image Connector for DEXIS

November 26, 2019

Integration Helps Eliminate Human Error and Enhances the Digital Workflow with Automation Tools

AMERICAN FORK, Utah, November 26, 2019-- Henry Schein One, a joint venture of Henry Schein Inc., announced today the availability of the Dentrrix® Smart Image connector for DEXIS™. This integration will enable oral health professionals to further automate their practice management with DEXIS software tightly woven into Dentrrix workflows.

Dentrrix Smart Image adds new levels of connectivity between Dentrrix practice management software and DEXIS imaging software with automation to improve practice efficiency. Dentrrix users acquire images and tag them with CDT codes to support proper tracking and reimbursement. Dentrrix Smart Image automatically posts each imaging procedure; to the ledger for payment, to the patient's continuing care dates for future eligibility, and to progress notes for audit assurance.

"We're excited to offer DEXIS users a streamlined, premier-level imaging process with the announcement of the Dentrrix Smart Image connector for DEXIS," said James A. Harding, Jr., Chief Executive Officer, Henry Schein One. "This new way of integrating imaging can mean immense time-savings, clinical care enhancements, and revenue opportunities for Dentrrix users. This integration also reinforces our commitment to helping our customers automate their practice workflow, by working together with partners like KaVo Kerr, so practices can better focus on patient care."

Since KaVo Kerr is a premier-level Dentrrix Smart Image partner, DEXIS users can help eliminate human errors in billing and reimbursements, timing of continuing care images, and record-keeping with automation through Dentrrix Smart Image. Dentrrix Smart Image also gives practices support to help elevate their clinical care, by allowing providers to easily access images from DEXIS, and other Smart Image partners, from the Dentrrix patient chart, with the ability to compare up to four images side-by-side for a fast and accurate diagnosis.

"Dentrrix Smart Image connector for DEXIS is a great asset to the KaVo Kerr family and builds on DEXIS efficient, effective dental workflows. Oral health professionals can easily capitalize on a DEXIS multifaceted industry-leading imaging ecosystem with Smart Image's clinical and financial features. This is a great opportunity for clinicians to enhance and streamline the digital workflow and treatment planning process of the award-winning DEXIS software platform," said Jordan Reiss, Director of Product Management, KaVo Kerr Imaging, North America.
