

Henry Schein Orthodontics Launches Carriere® Motion Pro™ Bite Corrector

January 8, 2024

Latest Addition to the Motion™ Portfolio, the New Carriere® Motion Pro™ Sets a New Standard in Versatility and Efficiency

MELVILLE, N.Y., January 8, 2024 — Henry Schein Orthodontics (HSO), the orthodontics business of Henry Schein, Inc. (Nasdaq: HSIC), expanded its product portfolio with the launch of the *Carriere® Motion Pro™* bite corrector¹. The newest addition to the *Motion* portfolio is fitted to teeth to treat the anteroposterior dimension of a patient's occlusion, allowing clinicians to achieve a Class I platform within an average of three to six months² of treatment, and before placing brackets or aligners. Watch [this video](#) to learn more about the benefits and features of the *Carriere Motion Pro*.

With the unique ability to treat both Class II and Class III patients with one device, *Carriere Motion Pro* bite corrector features a custom-designed drop-in hook to enhance treatment versatility. The wider reinforced cuspid pad hook ensures a consistent distribution of elastic forces, while the hook's deep undercut simplifies elastic engagements and effectively secures the [Force Oral Elastics](#), a portfolio of products designed to work seamlessly with *Motion* appliances to provide optimal results. The latest addition to the portfolio, the Force 3 Elastics, will be available soon.

The new *Carriere Motion Pro™* bite corrector also features a built-in scribe line, flat faces, straight edges, and a recessed dimple, helping to provide intuitive and accurate placement. This efficient design provides fast and predictable treatment, and the condyle shaped joint is designed to facilitate more natural and controlled movement.

"As Henry Schein Orthodontics continues to invest in innovative orthodontic products, we are pleased to announce the latest addition of the new *Carriere Motion Pro*," said Christophe Carsault, Vice President and General Manager, Henry Schein Orthodontics. "Just as the original *Motion* appliance revolutionized the way many orthodontists approach sagittal correction, we are confident that the new *Carriere Motion Pro™* will similarly advance orthodontics and help enhance our customers capabilities to achieve more efficient and predictable aligner and orthodontic treatment. We look forward to additional educational offerings and supporting our customers' innovation to help them deliver a new standard of care with the *Carriere Motion Pro*."

Like the *Carriere Motion Pro*, the original *Motion* appliances were created by Dr. Luis Carrière, who also popularized the *SAGITTAL FIRST™* philosophy, an approach to care that helps standardize, simplify, and shorten Class II and Class III treatment time by treating the AP dimension at the beginning of treatment².

"I'm happy to introduce the *Carriere Motion Pro* as a solution of honest and sophisticated design driven to maximize treatment efficiency and precision as well as patient comfort with an absolute ease of use," said Dr. Luis Carrière.
