

Revolutionizing Diabetes Care: Three Trends to Watch

November 12, 2024

Rimidi's Dr. Lucienne Ide Shares Key Insights for Health Care Providers During Diabetes Awareness Month

MELVILLE, N.Y., November 12, 2024 – November marks [American Diabetes Month](#)[®], a time to raise awareness of diabetes and to support the 1.2 million Americans diagnosed with diabetes each year, and more than 38 million Americans affected by the disease¹. In this video, Dr. Lucienne Ide, Founder and CEO of Rimidi, highlights three advancements in diabetes care.

Rimidi's [remote patient monitoring solution](#) for diabetes, available through Henry Schein Medical, connects patient-generated data from connected devices like blood glucose monitors, continuous glucose monitors, and insulin pens with clinical data in electronic health record (EHR) systems. This helps give clinicians a more complete view of a patient's health and drives patient-specific clinical insights and actions within the framework of the latest evidence and guidelines. The platform lives within the EHR—integrating seamlessly into the provider workflow.
